Subject index of volume 13

Asynchronous distributed system 29
Asynchronous systems 99

Byzantine failures 45

Checkpointing protocols 29
Chordal graphs 53
Computer aided verification 127
Congenial talking philosophers 189
Consensus 99, 219
Consis‘ent global states 85

Decision tasks 59
Distributed systems 45, 127
Distributed algorithms 219
Distributed debugging 85
Distributed mutual exclusion 207
Distributed systems 45

Failure detection 99
Fairness 239

Fault tolerance 29, 45, 99, 219
Fault-containment 1

Global predicate detection 85
Group mutual exclusion 189

Homology 59
Hot-potato packet routing 53
Hyperfairness 239

Livelock 53
Load 45

Mutual exclusion 1, 189

Performance analysis 155
Probabilistic automata 155
Probabilistic algorithms 19
Process crash 99
Process recovery 99

Quorums 45

Randomized consensus 155
Real-time monitoring 85
Resource allocation 189

Secure multicast 19
Self-stabilization 1, 207
Shared objects 219
Shared-memory algorithms 189
Simplicial complexes 59
Spanning tree 207
Stable storage 99
State space reduction 145
State Transition Systems 127

Token passing 207
Tree networks 53

Verification 155

Wait-free computing 59
Wide area network 19
